JG Environmental Ltd

Leading the way with Heat Treatments

Welcome to the instant solution to your pest problem.

What is a heat treatment?

The heat treatment is a revolutionary treatment that guarantees to remove the pest issue through the application of dry heat to the affected areas. The treatment is quick and effective and unlike chemical treatments that can take weeks to fully eradicate the problem, the heat treatment will rid you of the infestation in the same day!

Why would you choose this treatment? - The Benefits

- ✓ It's fast! - The quickest possible eradication, (hours rather than days or weeks).
- ✓ It's adaptable - We can treat multiple rooms or items with no limit on size.
- ✓ It's effective - Unlike sprays and fogs it kills all stages of the insect life cycle straight away.
- ✓ It's discreet - Our heaters can easily be hidden within the premises.
- ✓ It's convenient - Removes costs of disposing of and replacing items of furniture.
- ✓ It's safe - Reduced health and safety hazards from the heat process.
- ✓ It's easy - It requires little customer input.

Committed to providing a **service of the highest calibre**

We are so confident in our heat treatments, we provide a **guarantee** with every job.
If the problem isn't totally gone we will return absolutely **free of charge**.

Eradication

What can be killed using Heat?

- ✓ Bed bugs
- ✓ Moths
- ✓ Cockroaches
- ✓ Woodworm & wood-boring insects
- ✓ Fleas

What can be treated using Heat?

Our Heat treatment is so adaptable there isn't much that we can't treat. We have treated, schools, royal heritage buildings, hotels, universities and of course residential properties.

Our Heat treatment services do not stop there, we are able to treat in a number of other different situations, such as infested lorry cabs, infested aircraft, food processing flour mills, silos and shipping containers, or on a smaller scale, we regularly treat luggage for bed bugs or furniture for woodworm.
